

The VALLON marking system LIQMARK® is used to mark suspect spaces or to mark a safe lane with a spray system. The marking can be done with one finger without interrupting the detection procedure.

The marking liquid is of clear water or a mixture with anti-freezing agent and / or signal colour.

- Simple operation
- Applicable to all detectors available for VMH3CS; VMR2; VMR3; VMH3\*
- Storage tank with 0.5 liter liquid
- One filling for about 100 marking points
- Weight (empty): approx. 1kg

## Marking System LIQMARK®
