VMC1 – Metal Detector

Compact Metal Detector for Special Assignments

The VMC1 is the first compact metal detector from VALLON that has been designed specifically for special assignments. Its mechanical design and powerful combination of renowned high detection sensitivity and maximum detection stability have made it a proven tool around the globe for mine detection.

Its very compact design makes it highly convenient for transport. It becomes a full-size detector on site in just a few steps and is then ready to start operating.

In addition, simple and clearly identifiable operating elements guarantee outstanding ease of use and high detection reliability.

- ✓ Compact design
- ✓ High sensitivity combined with high-efficiency soil compensation
- ✓ Easily noticeable metal alarm indication (audio/visual/vibration)
- ✓ Pinpoint button for a higher degree of location detection accuracy

VALLON – A strong Partner

Experience is irreplaceable

As a family-run business from Eningen in Germany we became a global player within the field of explosive ordnance detection and the assessment of contaminated sites. All our activities focus on providing our customers with the best product for the respective application.

✓ GUIDANCE

From the initial contact to the selection of the optimal detector system and to the point of the professional start of operation – VALLON accompanies the complete process and supports you in a competent and professional manner.

✓ DETECTORS

Our product portfolio includes efficient solutions for detecting mines, improvised explosive devices (IEDs) and unexploded ordnance (UXO) – for the use on land, underwater and in boreholes.

✓ SOFTWARE

With the EVA4mobile® and the EVA4ALL® VALLON offers powerful software for data acquisition, evaluation and documentation. The firmware of VALLONs fourth generation of metal detectors is subject to continuous further development and can be adapted to satisfy specific customer requirements.

✓ TRAINING

In order to optimally prepare the user for their daily work VALLON offers custom-tailored training. The training courses can take place upon agreement on site or directly at VALLON in Eningen, Germany.

THE PATH TO BECOMING A GLOBAL PLAYER

The history of VALLON is also the history of metal detectors, degaussing coils, generators, and field computers. Over the years, the products became increasingly powerful and new, innovative technologies were added. The company was growing. VALLON leased more buildings and expanded its production capacity. Since 1982, the company has done business as Vallon GmbH, the corporate form it has today.
