VMH3CS – Metal Detector

Metal Detector with Exchangeable Search Coil

The VMH3CS metal detector has been developed especially for professional mine clearance as part of military and humanitarian assignments. It has been proven to be a highly reliable and mechanically rugged tool for a wide variety of tasks around the globe. This is especially true of use in highly mineralized soils.

Its mechanical design guarantees low-fatigue work, even during assignments lasting several hours. The VMH3CS can also be optimized through exchangeable search coils for various detection scenarios.

- ✓ Optimized ergonomics for long-term operation in military demining and humanitarian mine clearance
- ✓ High sensitivity combined with high-efficiency soil compensation
- ✓ Flexible application optimization thanks to exchangeable search coils
- ✓ Easily noticeable metal alarm indication (audio/visual/vibration)
- ✓ Button operated pinpoint function

VALLON – A strong Partner

Experience is irreplaceable

As a family-run business from Eningen in Germany we became a global player within the field of explosive ordnance detection and the assessment of contaminated sites. All our activities focus on providing our customers with the best product for the respective application.

✓ GUIDANCE

From the initial contact to the selection of the optimal detector system and to the point of the professional start of operation – VALLON accompanies the complete process and supports you in a competent and professional manner.

✓ SOFTWARE

With the EVA4mobile® and the EVA4ALL® VALLON offers powerful software for data acquisition, evaluation and documentation. The firmware of VALLONs fourth generation of metal detectors is subject to continuous further development and can be adapted to satisfy specific customer requirements.

✓ DETECTORS

Our product portfolio includes efficient solutions for detecting mines, improvised explosive devices (IEDs) and unexploded ordnance (UXO) – for the use on land, underwater and in boreholes.

✓ TRAINING

In order to optimally prepare the user for their daily work VALLON offers custom-tailored training. The training courses can take place upon agreement on site or directly at VALLON in Eningen, Germany.

THE PATH TO BECOMING A GLOBAL PLAYER

With the number and complexity of humanitarian crises on the rise, the challenges involved in demining and ordnance clearance also increase. Explosive ordnance poses a threat to the lives and livelihoods of people living in crisis regions. Despite long-term, considerable effort in the countries with the clearance of contaminated territory, the danger has still not been eliminated in many places. VALLON metal detectors provide valuable assistance.
